

Securities Services Online

[Securities Services Online \[2.0.X\] \(kbc.be\)](#)

January 2023

Securities Services Online (SSO) is a web interface KBC Securities Services makes available to its professional clients on a free-of-cost basis. It is being made available for the mere convenience of the client, as one of the manners to consult portfolios or to give instructions, next to other ones.

The tool supports different modules, that can be activated or de-activated in function of the needs of a (type of) client.

KBC invests great effort in keeping the application stable and secure, the Client from its perspective must see to it, that it protects the devices, with which it accesses the application against viruses, abuse or unauthorised access.

The Client is responsible for any access or instruction using the authentication means made available to it by KBC, and undertakes to inform KBC immediately if it discovers or even suspects that the access is being compromised.

The user will strictly comply with any user manual, security instructions or system requirements notified to it by KBC.

KBC endeavors to make the tool available permanently to its Clients, not guaranteeing to its clients availability in excess of 99% on an annual basis. In case of interruption of the service, KBC will prosper business resumption in accordance with its business continuity program. KBC may restrict the access to the application or even shut it down for reasons of security or maintenance.

Making available the application does not confer any intellectual property rights to the client, except for a limited, temporary, non-exclusive and revocable right to use the application for the purposes for which it was designed. KBC may at its own discretion and without prior notice, restrict access to the application, amongst others, but not restricted to, the discontinuation of the service, in case of security threats or extended periods of inactivity of the client. The application is made available as is, without any guarantee for its merchantability or adequateness for the use it was designed for. KBC cannot be held liable for any consequences of the temporary unavailability of the system, or even for erroneous or out dated information that may at any time be displayed by the system.

2 Introduction

With Securities Services Online (SSO), KBC Securities Services has developed a web-interface for all professional clients. The different modules of SSO can be activated to support the individual needs of every client.

Via SSO, clients have direct access to the backend system of KBC Securities Services . They will be able to perform real-time queries on account information and download reports.

With the module for settlement instructions, clients have an online view on all settlement instructions. The extensive trading module in SSO allows clients to simulate and input orders in a wide range of products and markets. The orderbook offers an online view on the status of all orders and allows clients to cancel or edit existing orders.

With the forex module, it's possible to create foreign exchange transactions and open accounts in other currencies.

The product information module offers access to KID and Target Market info. Finally, cash transfers can be created via SSO.

System requirements:

SSO does not require any additional software and is supported by the following browsers:

- Google Chrome
- Firefox
- Microsoft Edge

Contact:

In case of any questions or issues, please contact our Customer Support: customersupport@kbc.be

3 Logging on

For access to Securities Services Online (SSO), you need a personal digipass and PIN. To obtain your personal digipass, please contact clientadministration@kbc.be.

Do not share your digipass and PIN with any other persons. Keep the card in a secure place, in case of card theft, loss or damage, immediately contact clientadministration@kbc.be.

In case you forgot your PIN or locked your digipass, please also contact clientadministration@kbc.be.

To log on, please enter a valid user ID and response code in the logon-screen of Securities Services Online (SSO) on the website <https://bpo-app.securitiesservices.kbc.be>.

1. Enter your User-ID

2. To unlock your digipass, press and hold  and  at the same time.

3. Type in your pincode

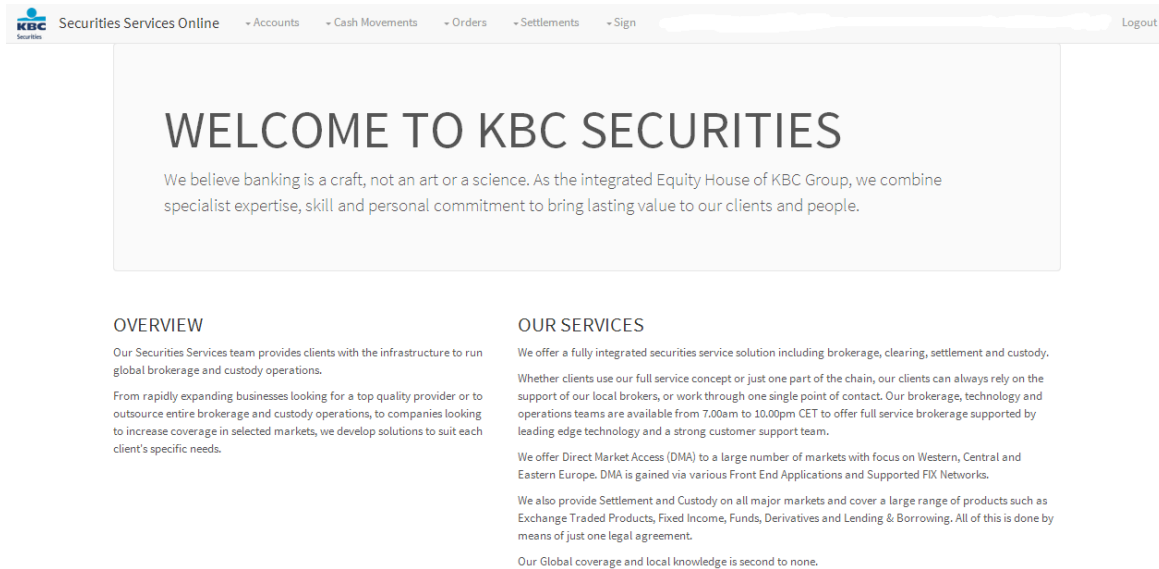

4. Press **1** to choose **APPLI 1**

5. Fill in the response code

LOGIN

3.1 Homepage

On the homepage of Securities Services Online (SSO), clients can find general information about KBC Securities Services, contact persons and the Standard Settlement Instructions of KBC Securities Services.

The screenshot shows the KBC Securities Services Online (SSO) homepage. At the top is a navigation bar with the KBC logo, the text 'Securities Services Online', and links for 'Accounts', 'Cash Movements', 'Orders', 'Settlements', 'Sign', and 'Logout'. Below the navigation bar is a large white box with the heading 'WELCOME TO KBC SECURITIES' and a paragraph: 'We believe banking is a craft, not an art or a science. As the integrated Equity House of KBC Group, we combine specialist expertise, skill and personal commitment to bring lasting value to our clients and people.' Below this box are two columns of text. The left column is titled 'OVERVIEW' and describes the team's infrastructure and services. The right column is titled 'OUR SERVICES' and lists various services including brokerage, clearing, settlement, custody, and Direct Market Access (DMA).

WELCOME TO KBC SECURITIES

We believe banking is a craft, not an art or a science. As the integrated Equity House of KBC Group, we combine specialist expertise, skill and personal commitment to bring lasting value to our clients and people.

OVERVIEW

Our Securities Services team provides clients with the infrastructure to run global brokerage and custody operations.

From rapidly expanding businesses looking for a top quality provider or to outsource entire brokerage and custody operations, to companies looking to increase coverage in selected markets, we develop solutions to suit each client's specific needs.

OUR SERVICES

We offer a fully integrated securities service solution including brokerage, clearing, settlement and custody.

Whether clients use our full service concept or just one part of the chain, our clients can always rely on the support of our local brokers, or work through one single point of contact. Our brokerage, technology and operations teams are available from 7.00am to 10.00pm CET to offer full service brokerage supported by leading edge technology and a strong customer support team.

We offer Direct Market Access (DMA) to a large number of markets with focus on Western, Central and Eastern Europe. DMA is gained via various Front End Applications and Supported FIX Networks.

We also provide Settlement and Custody on all major markets and cover a large range of products such as Exchange Traded Products, Fixed Income, Funds, Derivatives and Lending & Borrowing. All of this is done by means of just one legal agreement.

Our Global coverage and local knowledge is second to none.

4 Accounts

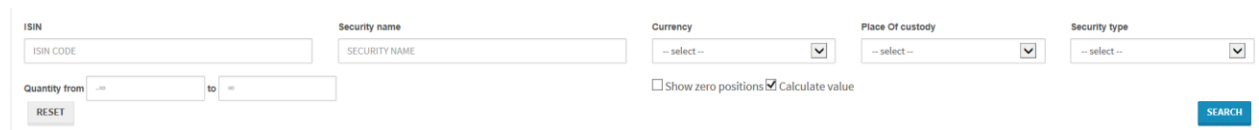

4.1 General principles

With the accounts module, clients have an online view on their accounts to see the current securities and cash positions. All accounts will be visible, also blocked and margin accounts. Securities and cash movements can easily be queried online on several search criteria. Clients can also view and download XLS- and PDF reports and send reports to their email-address.

4.2 Overview Securities accounts

Clients have an online view on all securities accounts that have been set up. Clients can query movements on several criteria or a combination of these criteria, and see the details of the different security movements.

Possible search criteria:

The screenshot shows a search form with the following fields and controls:

- ISIN**: A text input field labeled "ISIN CODE".
- Security name**: A text input field labeled "SECURITY NAME".
- Currency**: A dropdown menu with "-- select --" as the placeholder.
- Place Of custody**: A dropdown menu with "-- select --" as the placeholder.
- Security type**: A dropdown menu with "-- select --" as the placeholder.
- Quantity from**: A text input field with "--" as the placeholder.
- to**: A text input field with "--" as the placeholder.
- RESET**: A button below the quantity fields.
- Show zero positions**: An unchecked checkbox.
- Calculate value**: A checked checkbox.
- SEARCH**: A blue button on the right side of the form.

ISIN

In this field, the user can input the ISIN-code of the security.

Security name

In this field, the user can input the name of the security.

Currency

A list of all currencies will be shown, the client can select a specific currency in the list or type the currency code.

Place of custody

A list of all possible places of custody will be shown; the client can select a specific place of custody.

Security Type

A list of all possible security types will be shown, the client can select a specific security type.

Quantity from – Quantity to

In this numerical field, the client can fill in the quantity from/to.

From the Securities accounts overview, clients also have a direct link to the order form, via the "Create Order" button , provided that the security is tradable. The client will immediately be presented with the order form, see 3.1.2 "Create Order".

Action	Price per unit	Units	Total Value	Contract Note
Fund Subscription	123.56	2.0000	247.1200	55032872
Fund Subscription	123.56	2.0000	247.1200	55032869

View detail Securities movements:

The screenshot displays the 'Securities Accounts' section with a search filter for 'PERINVEST'. A table lists securities accounts with columns for Client, Client Name, Account Description, ISIN, Security name, Curr, and Type. A 'WHIT FDS' button is visible next to the first entry.

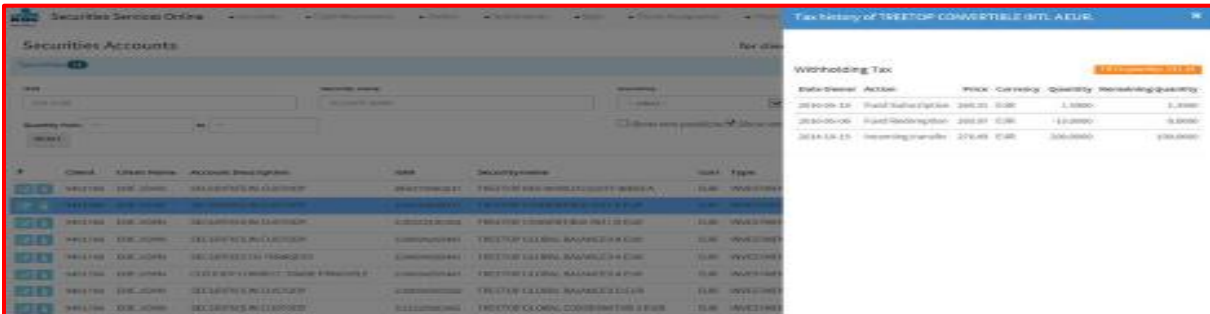

On the right, a pop-up window titled 'Transaction history of PERINVEST ASIA DIVIDEND EQUITY A EUR.' shows a table of transactions:

Cur	Action	Price per unit	Units	Total Value	Contract Note
EUR	Fund Subscription	123.56	2.0000	247.1200	55032872
EUR	Fund Subscription	123.56	2.0000	247.1200	55032869

Below the table, a 'Movements summary' section provides details for the 'Fund Subscription' transaction type, including Price (123.5600 EUR), Units (2), Operation date (2015-04-14), Value date (2015-04-17), Currency (EUR), and ClientRef (000003080232).

The button **WHIT FDS** (Withholding Tax on Funds) next to a securities position indicates the tax relevancy of the security. Behind this button, the historical movements and their tax relevant information will be provided:

- o Date ownership
- o Action (= Transaction type)
- o Price (= initial or historical price)
- o Currency (=price currency)
- o Quantity (= initial transaction quantity)
- o Remaining Quantity (= initial quantity minus sell transactions or other debit movements)

The screenshot shows the 'Tax history of TREE TOP CONVERTIBLE INTL A EUR.' pop-up window. It contains a table with columns for Date/Owner, Action, Price, Currency, Quantity, and Remaining quantity. The table lists several transactions, including 'Fund Subscription' and 'Fund Redemption'.

4.3 Overview Cash accounts

Clients have an online view on all cash accounts that have been set up. Clients can query movements on several criteria or a combination of these criteria, and see the details of the different cash movements.

Possible search criteria:

5 Cash movements

5.1 Pending cash transfers

In the overview of pending cash transfers, clients can see cash transfers that have been created, but have not been booked yet. These cash transfers have not been processed automatically, because there are validation issues. KBC Securities Services will follow up these pending cash transfers, and will contact the client if any action has to be taken.

In the overview screen, clients have a view on the pending cash transfers, It's not possible to perform any actions here.

Account	Name	BIC	Status	Amount	Currency	Value Date
BE30733020872511		KREDBEBB		1.0000	EUR	14/04/2015
BE30733020872511		KREDBEBB		10.0000	USD	14/04/2015

5.2 External Cash transfers

With the “external cash transfer” module, clients can transfer cash to an external reference account. With the “internal cash transfer” module, clients can shift cash from one account to another.

5.2.1 External cash transfer to a reference account

The reference account (set up in the system of KBC Securities Services) can be selected in a list of possible accounts. To register the cash transfer, the amount, currency and comment (optional) have to be filled in.

After validation, the cash transfer will have to be signed in the “sign” screen by the same user or another user (if the 4-eyes principle has been set up for this client), see 4.2. After signing the cash transfer, it will automatically be routed to KBC Securities Services backend system for further processing.

5.2.2 External cash transfers to other accounts

This functionality is only available for BPO clients.

With the “external cash transfers” module, clients are also able to transfer cash to an account which has not been set up as a reference account by KBC Securities Services.

In this case, clients have to fill in the amount, currency, the IBAN and BIC and full name and address of the beneficiary (mandatory for USD and CAD, not for other currencies), and a comment (optional).

After validation, the cash transfer will have to be signed in the “sign” screen by the same user or another user (if the 4-eyes principle has been set up for this client), see 4.2. After signing the cash transfer, it will automatically be routed to KBC Securities Services backend system for further processing.

5.3 Internal cash transfers

With the “internal cash transfer” module, clients can transfer cash between different client accounts.

Clients have to select the client “from” and client “to”, fill in the amount and currency, and add a comment (optional). After validation, the cash transfer will have to be signed in the “sign” screen by the same user or another user (if the 4-eyes principle has been set up for this client), see 4.2. After signing the cash transfer, it will automatically be routed to KBC Securities Services backend system for further processing.

5.4 Technical cash transfers

With the 'Technical cash transfer' module, clients can enter cash movements on internal waiting accounts.

The client can select the type of technical cash transfer. KBC Securities Services is able to create other types of technical cash transfers upon request of the client.

After validation of the booking instruction, the cash booking will have to be signed in the "sign" screen by the same user or another user (if the 4-eyes principle has been set up for this client), see 4.5. After signing the cash transfer, it will automatically be routed to KBC Securities Services backend system for further processing.

Following 'transfer types' are available:

06 'commercial concession'

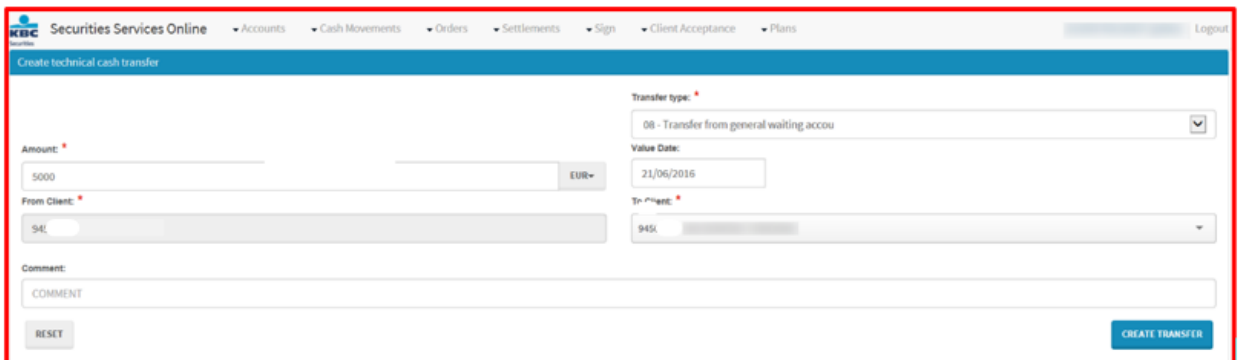

- ⇒ This transfer type allows the client to book a commercial concession to the end-customer cash account in EUR. Other currencies are possible under the condition that the end-customer has a cash account in the currency and the BPO client has transferred the amount in the same currency to their KBC Bank cash account.
(e.g. from account 9xxxxxx 499 978 978 to account 9xxxxxx 401 000 978)
- ⇒ The client completes following fields
 - Amount per account (mandatory)
 - Currency (mandatory)
 - Value date (optional): if not completed, the system will take the current date as value date.
 - Beneficiary account end-customer (select in 'to client') (mandatory)
 - Comment (optional). The comment is not reported to the end-customer, but is only captured in the back end.

08 'Transfer from general waiting account'

- ⇒ This transfer type allows the client to book an amount on the general waiting account (e.g. incoming cash transfer with AML checks to perform) to the end-customer cash account in EUR. Other currencies are possible under the condition that the end-customer has a cash account in the currency and BPO client has received the amount in the same currency on their KBC Bank cash account.
(e.g. from account 9xxxxxx 499 978 978 to account 9xxxxxx 401 000 978)

- ⇒ The client completes following fields
- Amount per account (mandatory)
 - Currency (mandatory)
 - Value date (optional): if not completed, the system will take the current date as value date.
 - Beneficiary account end-customer (select in 'to client') (mandatory)
 - Comment (optional). The comment is not reported to the end-customer, but is only captured in the back end.

09 'Stock Exchange Tax'

- ⇒ This transfer type allows the client to confirm the payment in EUR of this tax to the financial authorities
- ⇒ Debit account is defaulted by the system
- ⇒ Credit account is defaulted by the system
- ⇒ The client completes following fields
- Amount (mandatory)

Securities Services

- Value date (optional): if not completed, the system will take the current date as value date.
- Comment (optional). The comment is not reported in the movements, but is only captured in the back end for information.

10 'Local Withholding tax'

- ⇒ This transfer type allows the client to confirm the payment in EUR of this tax to the financial authorities
- ⇒ Debit account is defaulted by the system
- ⇒ Credit account is defaulted by the system
- ⇒ The client completes following fields
 - Amount (mandatory)
 - Value date (optional): if not completed, the system will take the current date as value date.
 - Comment (optional). The comment is not reported in the movements, but is only captured in the back end for information.

11 'VAT'

- ⇒ This transfer type allows the client to confirm the payment in EUR of this tax to the financial authorities
- ⇒ Debit account is defaulted by the system
- ⇒ Credit account is defaulted by the system
- ⇒ The client completes following fields
 - Amount (mandatory)
 - Value date (optional): if not completed, the system will take the current date as value date.

6 Orders

6.1 Create Order

With the “create order” module, clients can create orders in a wide range of products. After signing the order, it will be sent to KBC Securities Services order book, where it will be processed immediately and automatically.

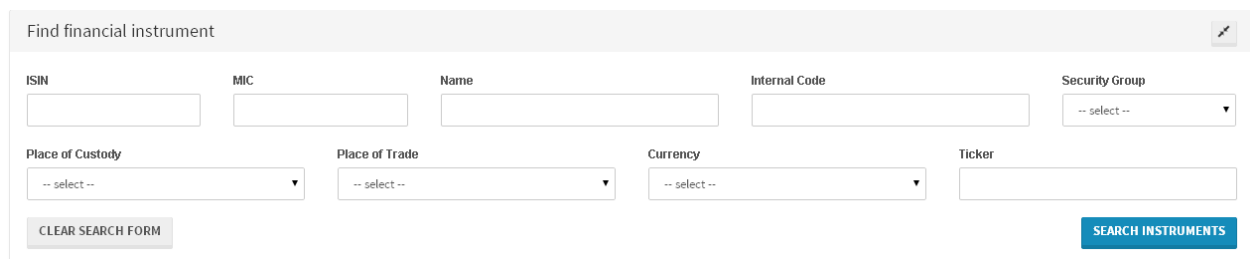

To create an order, the following steps have to be completed:

1. **Find and select financial instrument:** select the financial instrument
2. **Fill in order form:** complete the order form
3. **Register order:** register the order

6.1.1 Find and select financial instrument

Possible search criteria:

ISIN

In this field, the user can fill in the ISIN-code of the security.

MIC

In this field, the user can fill in the MIC-code of the market.

Security name

In this field, the user can fill in the name of the security.

Internal code

In this field, the user can fill in the internal code of the security; this is the internal code in the system of KBC Securities.

Security Group

A list of all possible security Groups will be shown, the client can select a specific security Group.

Place of custody

A list of all possible places of custody will be shown; the client can select a specific place of custody.

Place of trade

A list of all possible places of trade will be shown; the client can select a specific place of trade.

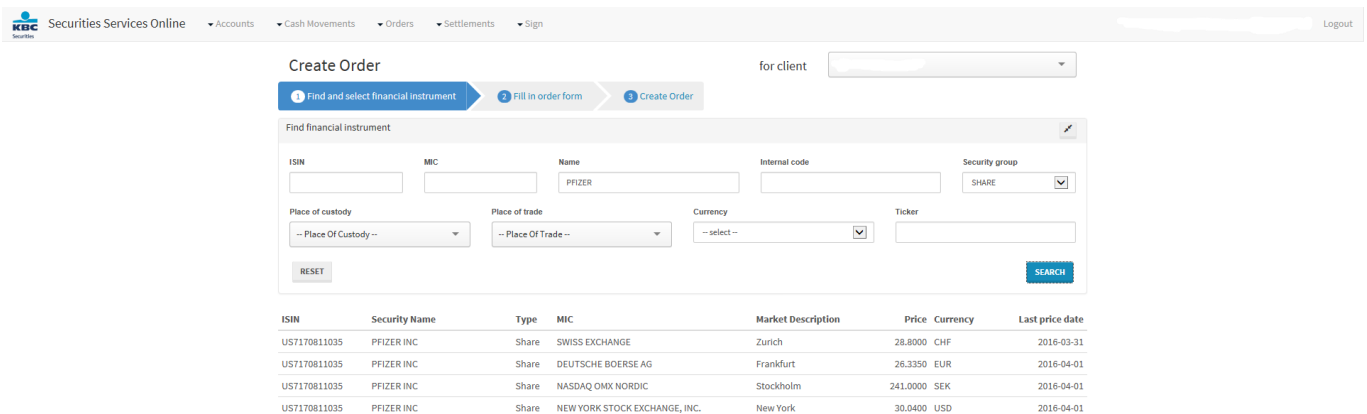

Currency

A list of all currencies will be shown; the client can select a specific currency in the list or type the currency code.

Ticker

In this field, the client can look for a ticker code.

Based on one or more of these search criteria, a list of securities will be shown.

ISIN	Security Name	Type	MIC	Market Description	Price	Currency	Last price date

In the input screen, all mandatory fields are marked with *.

Fields order form:

ISIN

Filled in automatically based on the security.

Security Name

Filled in automatically based on the security.

Operation

Buy or Sell / Subscribe or Redeem (for OTC funds).

Use Best Execution

The client can select Best Execution or not.

Order Type

The client can select the Order Type in a list of possible Order Types.

Place of trade

Filled in automatically, based on the security and Best Execution indicator.

Quantity or Amount

Quantity or amount to be filled in. It's only possible to create orders in amounts for OTC Funds if orders in amounts are allowed for the security and transfer agent.

Limit price

The client can fill in a limit price (only for limit order).

Decision Maker

The field will be pre-filled with the possible decision makers for this account, according to the Mifid II regulation. The client can choose the decision maker based upon this.

Shortselling Indicator

In case a Sell is chosen, the client can choose a Shortselling indicator according to the Mifid II regulation.

Settlement Currency

The client can select the currency he wants the order to be booked in. The available currencies are listed; these are currencies in which the client has opened a cash account.

Validity Date

The client can select a validity date. The default Validity Date is the last business day of the next month, but the client can choose any other date. For OTC funds (redemption/subscription), the validity date will be fixed at 1 year.

External Reference

The client can add his own reference (optional, only capital letters).

After completing the order form, the order can be created ("register order" button), simulated ("simulate order" button) or the screen can be cleared ("reset" button).

6.1.3 Simulate order

The client can simulate the order and all costs involved by clicking on the "create order" button. An overview of all transaction details and fees will be shown.

Also the Ex-Ante Cost projection is shown in this screen and available to download as pdf file. Attention! The Ex-Ante Cost Projection provides an estimate of the cost for buy/sell orders, this can be different from the effective costs that will be applied.

7.1.1 Standing Instructions

Via the Standing Instructions module it is possible to register/edit client's standing instructions for corporate actions (DRIP – Dividend Reinvestment and DVOP – Dividend Option).

Currently, standing instructions can only be registered/edited for individual client accounts. Any standing instruction that has already been set up in our back-office system will be visible in SSO:

Standing Instruction for Corporate Actions for client

Create Standing Instructions for

DRIP (Dividend Reinvestment):

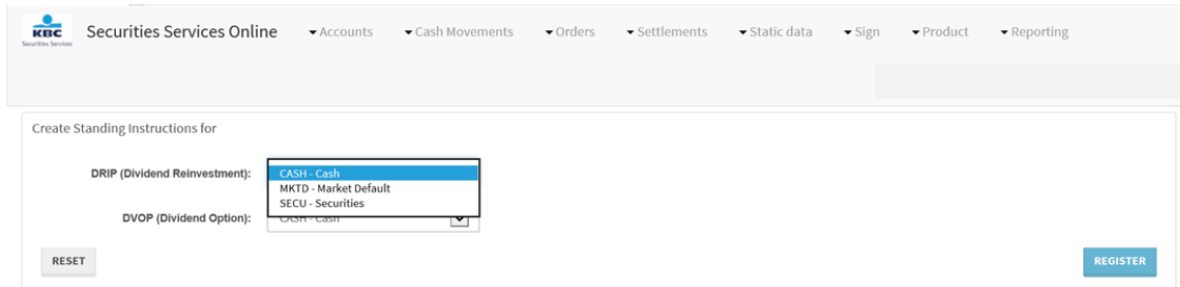

DVOP (Dividend Option):

If the client account does not have a standing instruction yet, the fields will be blank:

DRIP (Dividend Reinvestment): *

DVOP (Dividend Option): *

3 options are available: cash, securities and market default

Clients can explicitly elect to always receive the market default, thus avoiding the need to ever send us their election for DRIP or DVOP events. In this case the Market Default ("MKTD") option has to be selected.

If standing instructions are registered via SSO, they need to be registered both for DRIP (Dividend Reinvestment) and DVOP (Dividend Option).

When standing instructions are modified, but not registered yet, the 'reset' button can be used to go back to the initial situation.

Upon registration of a new standing instruction, a warning message will indicate that the end client's standing instruction will only be applicable for FUTURE corporate actions.

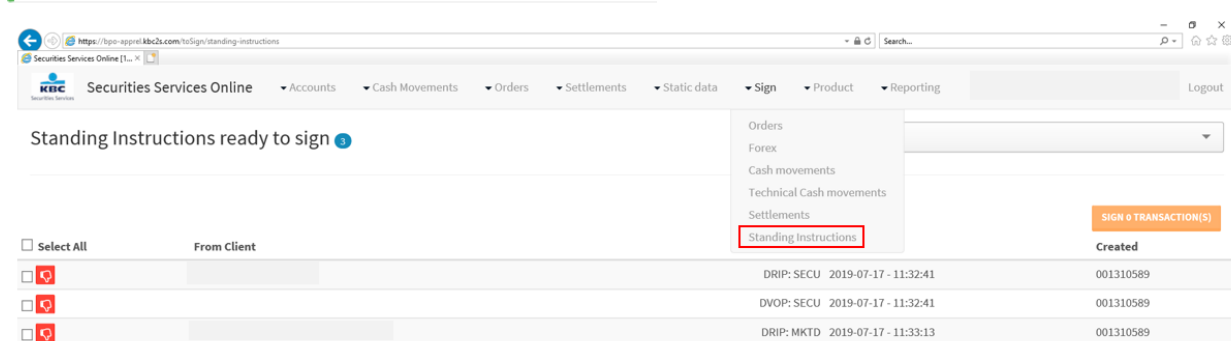

!! Careful !! For corporate actions with short deadlines, notifications will be sent before entitlement date. It will not be possible to register/edit standing instructions in SSO for these events. Standing instructions for a corporate event are downloaded upon creation of the notification. Therefore, once a notification has been received, it is no longer possible to register/edit standing instructions for this specific event.

7.1.2 Sign Standing Instructions

When standing instructions are modified and registered via the 'register' button, they will have to be signed in the sign module. Other standing instructions can be registered before signing.

We successfully registered the Standing Instruction(s).

You can **REGISTER NEW STANDING INSTRUCTION** or **SIGN**

The screenshot shows the 'Sign' module in the KBC Securities Services Online interface. The breadcrumb trail is: Home > Accounts > Cash Movements > Orders > Settlements > Static data > Sign > Product > Reporting. The main heading is 'Standing Instructions ready to sign'. A dropdown menu is open, showing options: Orders, Forex, Cash movements, Technical Cash movements, Settlements, and Standing Instructions (which is highlighted with a red box). Below the menu is a table of standing instructions ready for signing.

<input type="checkbox"/> Select All	From Client				SIGN & TRANSACTION(S)	Created
<input type="checkbox"/>			DRIP: SECU	2019-07-17 - 11:32:41		001310589
<input type="checkbox"/>			DVOP: SECU	2019-07-17 - 11:32:41		001310589

8 Sign

In SSO, all instructions (orders, forex, cash movements and settlement instructions) will have to be signed by digipass. If the 4-eyes principle has been set up, another user will have to sign the instructions. If the 4-eyes principle has not been set up, a user can sign his own instructions.

In the sign screen, the user can sign instructions individually or in bulk. When signing orders or cash movements, all validation rules will be checked again (user authorities, account setup, sufficient cash and securities, security open for trading ...)

There is a sign screen for:

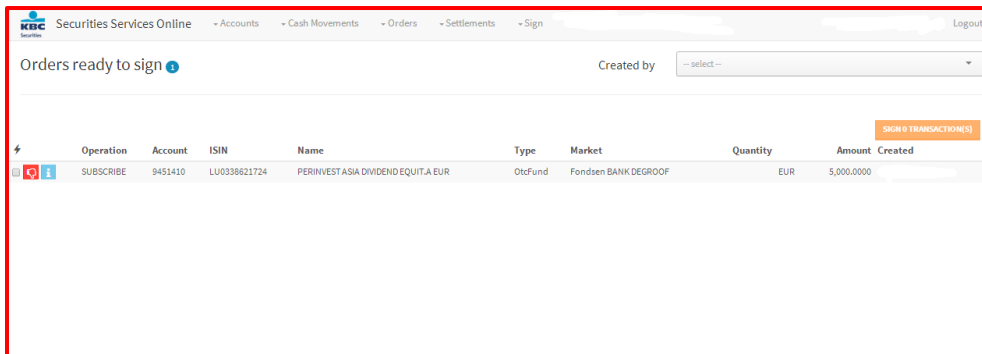

- Orders
- Forex
- Cash movements
- Settlement Instructions
- Plans
- Standing Instructions

8.1 Sign orders

8.1.1 View

All orders or cancellations of orders that have been created by any user will have to be signed in the “sign screen”.

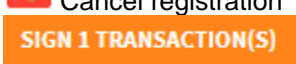

By default, all orders that need to be signed will be shown. Additionally, a filter can be used to filter on the user who created the order.

9 Plans (Investment and Income Plans)

9.1 Overview

In the Plan overview, the client can see all plans of a specific selected account, regardless of the source (created via SSO, manually by KBC Securities Services or via the Client Portal). By default, client will see all plans of the selected account, but he can filter on some search criteria for the selected account.

The screenshot displays the KBC Securities Services Online interface. At the top, there is a navigation bar with the KBC logo and the text 'Securities Services Online'. Below this, a menu bar contains several options: Accounts, Cash Movements, Orders, Settlements, Sign, Client Acceptance, and Plans. The 'Plans' menu is expanded, showing 'Overview', 'Create Investment Plan', and 'Create Income Plan'. Below the navigation bar, there is a section titled 'Investment and income plans' for a specific client. A search bar labeled 'Search client...' is present. Below this, a yellow message box states 'No client selected.' The main content area contains a form with the following fields: 'Name' (with a placeholder 'PLAN NAME'), 'Amount' (with 'from' and 'to' sub-fields), 'Currency' (with a dropdown arrow), and 'Fund' (with a text input field). There are also checkboxes for 'Active plans', 'Cancelled plans', and 'Suspended plans'. At the bottom of the form, there are 'RESET' and 'SEARCH' buttons.

Name

The client can enter a name in order to filter on the name of the investment or income plan.

Amount

The client can search for a plan between or equal to a range of 2 amounts (from – to).

Currency

A list of all currencies will be shown; the client can select a specific currency in the list or type the currency code.

Fund

The client can enter a fund name in order to filter by fund.

Additionally, the client can select the following plans:

- Active Plans
- Cancelled Plans
- Suspended Plans

☐ Active plans
 ☐ Cancelled plans
 ☐ Suspended plans

Following fields have to be completed when creating a saving plan.

Field Name	Description	Mandatory/Optional
Name	Enter a name of the saving plan.	mandatory
Comment	Enter some specific comments for internal use.	optional
Amount	Enter an amount for the saving plan. This amount is checked on predefined minimum and maximum amounts allowed for a saving plan. A warning is given when the entered amount is not in the range of these minimum and maximum amounts for a plan.	mandatory
Currency	Select the currency of the amount entered for the saving plan. For end-customers with only 1 currency account (online end-customers) the currency is entered automatically and cannot be changed. For end-customers with more than 1 currency cash account (wealth end-customers), the currency has to be selected	mandatory
Cash Account	The cash account is entered automatically when selecting the currency of the plan amount. This field cannot be changed.	mandatory
Securities Account	The securities account is filled automatically. This field cannot be changed.	mandatory
Running	Enter the frequency of the saving plan. Possible frequencies depend on the end-customer type (online or Wealth)	Mandatory
From	Enter the start date of the plan.	Mandatory
To	Enter the end date of the plan.	Optional
Securities	Select a fund from the list	
Models	Select a model with one or more funds	
Percentage	Enter a percentage of the total plan amount to invest per fund. The sum of percentages for all selected funds in a plan has to be equal to 100. When entering a percentage the amount per fund is calculated automatically.	Mandatory

The client can select funds out of a list 'Securities' or a portfolio model 'Models' on the right of the screen.

Adding a fund or a model is possible via the button  before the fund or the model.

Up to 5 funds can be added to the saving plan. A fund can only be added once to the same plan.

9.2.1 Selection list 'Securities'

Select a fund from the 'securities' list via . The fund will then be added to the 'selected funds' area. The client can add up to 5 funds.

A selected fund can be removed via the button .

Complete the percentage for the selected fund(s). Default there is no percentage completed. In this case the amount of the fund is 0,00. Via the 'mouse over' on the warning button  the client sees a warning related to the required minimum investment amount of the fund.

CREATE INVESTMENT PLAN

Create the plan by clicking on the button . Error messages are shown when mandatory fields are not correctly filled in.

A created plan has to be signed by a different user in order to be confirmed. More details on the signing of a plan can be found in section 4.

9.3 Create Income Plans

The client can create an income plan by selecting an end-customer account.

Following fields have to be completed when creating an income plan.

Field Name	Description	Mandatory/Optional
Name	Enter a name of the income plan.	mandatory
Comment	Enter some specific comments for internal use.	optional
Amount	Enter an amount for the income plan. This amount is checked on predefined minimum and maximum amounts allowed for an income plan. A warning is given when the entered amount is not in the range of these minimum and maximum amounts for a plan.	mandatory
Currency	Select the currency of the amount entered for the saving plan. For end-customers with only 1 currency account (online end-customers) the currency is entered automatically and cannot be changed. For end-customers with more than 1 currency cash account (wealth end-customers), the currency has to be selected	mandatory
Cash Account	The cash account is entered automatically when selecting the currency of the plan amount. This field cannot be changed.	mandatory
Securities Account	The securities account is filled automatically. This field cannot be changed.	mandatory
Running	Enter the frequency of the saving plan. Possible	Mandatory

	frequencies depend on the end-customer type (online or Wealth)	
From	Enter the start date of the plan.	Mandatory
To	Enter the end date of the plan.	Optional
Securities	Select a fund from the list. This list is limited to the holdings in the securities account of the end-customer.	
Percentage	Enter a percentage of the total plan amount to invest per fund. The sum of percentages for all selected funds in a plan has to be equal to 100. When entering a percentage the amount per fund is calculated automatically.	Mandatory

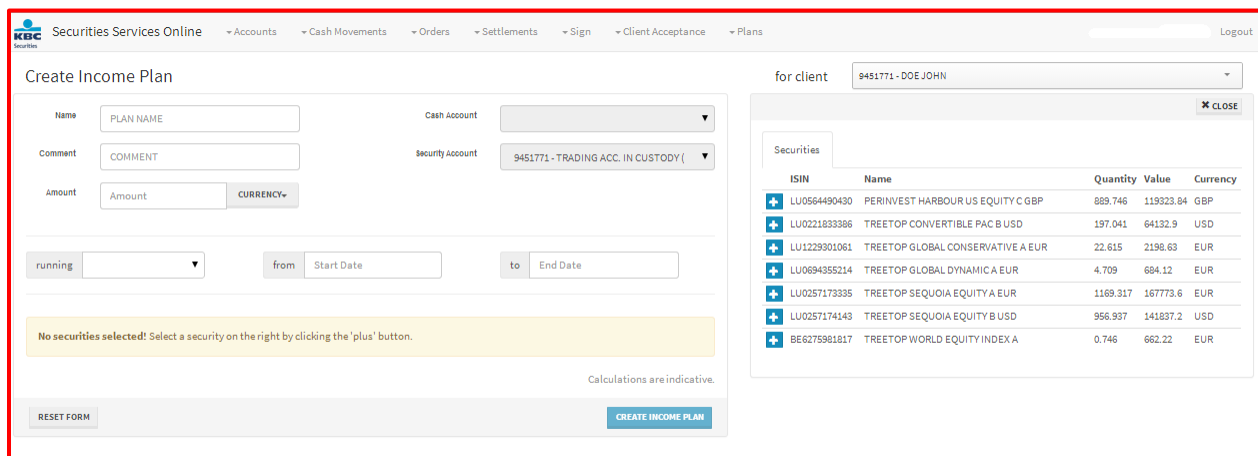

The client can select funds out of a list 'Securities' on the right of the screen.

Select a fund from the 'securities' list via . The fund will then be added to the 'selected funds' area. The client can add up to 5 funds. A fund can only be added once to the same plan.

A selected fund can be removed via the button .

Complete the percentage for the selected fund(s). Default there is no percentage completed. In this case the amount of the fund is 0,00. Via the 'mouse over' on the warning button  the client sees a warning related to the required minimum sell amount of the fund.

Create the plan by clicking on the button . Error messages are shown when mandatory fields are not correctly filled in. A created plan has to be signed by a different user in order to be confirmed. More details on the signing of a plan can be found in section 4.

10 Settlement Instructions

10.1 General principles

- All instructions that are entered in SSO will follow a **4-eye principle**: first one user enters the instruction details. The system stores the instruction in a waiting room. Then a user needs to check and authorize the instruction before it is delivered to the back-end of KBC Securities Services. The same 4-eyes principle also applies to cancelling an instruction. Information about who created and who authorized an instruction is available in the instruction follow-up overviews.
- **Cancel instructions are not shown** as a separate instruction. Only New instruction will be shown, with status "Cancel Pending" or "Cancelled".
- **Archived** settlement instructions **can not be viewed** in SSO. A settlement instruction will be archived 3 months after settlement or cancellation.
- **Basic validations** are performed during instruction creation. The full SI validation is performed only when the instruction is delivered to TPS.
- Changes in instruction data are sent to the front-end using a **push mechanism**. This means that the user will have up-to-date information about the status of his instructions, without having to refresh manually.
- When creating an **internal settlement** instruction, only one instruction is needed.

10.2 Overview

In the overview, all settlement instructions of the client are shown, regardless of where they have been created: via Swift, SSO or manually by KBC Securities Services. By default, all open settlement instructions are visible. Open instructions are settlement instructions that are not settled or have not been cancelled. The instructions are ranked by input date, which means that the most recent settlement instructions are at the top.

An extensive list of search criteria has been added in the active overview. The client can filter on one or more search criteria. The selected search criteria can easily be deleted by pressing the "clear" button.

Possible search criteria:

Status

Possible parameters:

- Cancel Pending
- Cancelled
- Matched
- Open
- Settled
- Validated

Instruction type

Possible parameters:

- Deliver against payment
- Deliver free of payment
- Receive against payment
- Receive free of payment

Sender reference

In this field, a client can search on the sender reference. Automatically a wildcard will be added at the end, which means that all instructions starting with this reference will be shown.

Account

In this field, the client can select the safekeeping account with KBC Securities Services. All accounts that have been setup for the user will be visible and can be selected. The format of the safekeeping account is always 7 digits + 000.

ISIN

In this field, the user can input the ISIN-code of the security.

Place of custody

A list of all possible places of custody will be shown; the client can select a specific place of custody.

Currency

A list of all currencies will be shown; the client can select a specific currency in the list or type the currency code.

Quantity from – Quantity to

In this numerical field, the client can fill in the quantity.

Amount from – Amount to

In this numerical field, the client can fill in the amount.

Trade Date from – Trade Date to

The client can select a trade date in the calendar, or type a specific trade date.

Settlement Date from – Settlement Date to

The client can select a settlement date in the calendar, or type a specific settlement date.

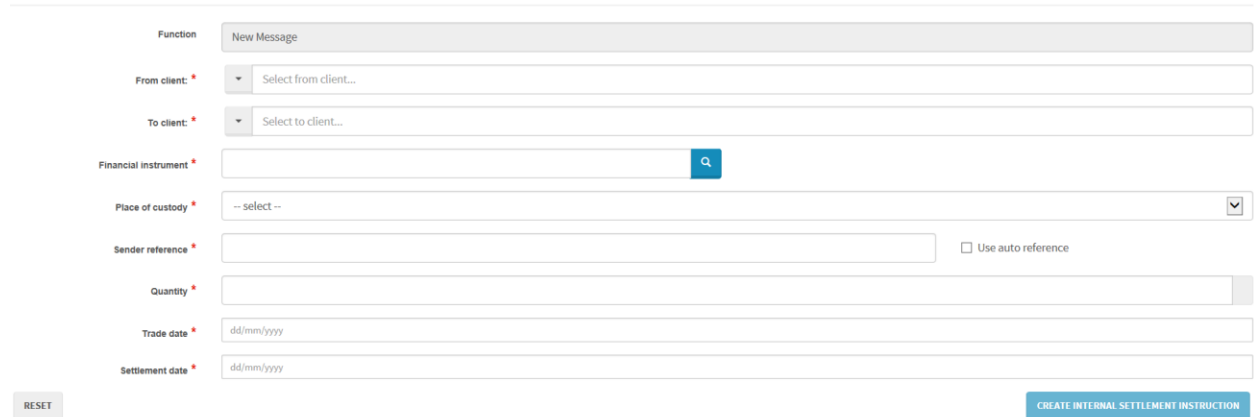

With the  “View details” button, the client can see the details of the settlement instructions.

10.3 Create Internal SI

It is possible to create an Internal Settlement Instruction, to settle between two Client Accounts.

Create Internal Settlement Instruction

Trade Details

The screenshot shows a web form titled "Create Internal Settlement Instruction" with a sub-section "Trade Details". The form includes the following fields and controls:

- Function:** A dropdown menu set to "New Message".
- From client:** A dropdown menu with the text "Select from client..." and a small downward arrow.
- To client:** A dropdown menu with the text "Select to client..." and a small downward arrow.
- Financial instrument:** A text input field with a magnifying glass icon on the right.
- Place of custody:** A dropdown menu with "-- select --" and a small downward arrow.
- Sender reference:** A text input field with a checkbox labeled "Use auto reference" to its right.
- Quantity:** A text input field.
- Trade date:** A text input field with a date format hint "dd/mm/yyyy".
- Settlement date:** A text input field with a date format hint "dd/mm/yyyy".

At the bottom left of the form is a "RESET" button, and at the bottom right is a blue button labeled "CREATE INTERNAL SETTLEMENT INSTRUCTION".

Trade Details:

Function

The function will always be NEWM (new message). Clients will be able to cancel instructions via the “overview” screen, not via the “create” screen.

From Client

Client account where the security is to be transferred from.

To Client

Client account where the security is to be transferred to.

Financial Instrument

In this field, the user can manually input the ISIN-code of the security, or he can select a security by clicking on the magnifying glass:

- Select from my accounts: the client can query on the securities positions on his account.
- Select a security with the following parameters (uncheck the “select from my accounts” box):
 - o ISIN
 - o Name
 - o Internal Code KBC Securities Services
 - o Security Group (share, bond, ...)
 - o Place of Custody (list of possible places of custody)

Place of custody

A list of places of custody that are possible for the selected security will be shown. If the chosen security has only one place of custody, then this place of settlement will be filled in automatically.

Sender Reference

In this field, a client can fill in the sender reference, or he can choose to select an automatically generated reference. The sender reference has to be a unique reference per safekeeping account.

Quantity

In this numerical field, the client can fill in the quantity.

Settlement Amount

In this numerical field, the client can fill in the settlement amount.
This field is only mandatory for instructions against payment.

Trade Date

The client can select a trade date in the calendar, or type a specific trade date.

Settlement Date

The client can select a settlement date in the calendar, or type a specific settlement date.

Sender Reference

In this field, a client can fill in the sender reference, or he can choose to select an automatically generated reference. The sender reference has to be a unique reference per safekeeping account.

Quantity

In this numerical field, the client can fill in the quantity.

Settlement Amount

In this numerical field, the client can fill in the settlement amount.
This field is only mandatory for instructions against payment.

Trade Date

The client can select a trade date in the calendar, or type a specific trade date.

Settlement Date

The client can select a settlement date in the calendar, or type a specific settlement date.

Settlement details:

Place of Settlement

The place of settlement is linked to the place of custody in combination with the type of security (bonds, shares, ...) and will be filled in automatically.

Receiving/Delivering Agent (REAG/DEAG) = Custodian counterparty

Party

The client can fill in the receiving or delivering agent, depending on the type of instruction (receive or deliver).

- BIC-code: the BIC-code has to be typed by the client
- External code: the external code of the place of settlement will automatically be offered, for example DTC, DAKV, The client can select the specific external code and fill in the code.
- Name: if the receiving/delivering agent does not have a BIC-code or an external identifier code, the client can type the name of the receiving/delivering agent.

Account

In this field, the client can fill in the account of the receiving/delivering agent with the global custodian.

Buyer/Seller (BUYR/SELL) = Counterparty

Party

A client can fill in the buyer/seller, depending on the type of instruction (receive or deliver).

- BIC-code: the BIC-code has to be typed by the client
- External code: the external code of the place of settlement will automatically be offered, for example DTC, DAKV, The client can select the specific external code and fill in the code.
- Name: if the counterparty does not have a BIC-code or an external identifier code, the client can type the name of the receiving/delivering agent.

Account

In this field, the client can fill in the account of the buyer/seller with the receiving/delivering agent.

Settlement Details

Place of settlement	SICVFRPP	
Delivering agent [DEAG]		
Party *	BIC <input type="text"/>	PARTY CODE <input type="text"/>
Account	<input type="text"/>	
Seller [SELL]		
Party	-- select -- <input type="text"/>	PARTY CODE <input type="text"/>
Account	<input type="text"/>	

Optional parameters:

Receiving/Delivering Custodian (RECU/DECU) = Global Custodian of the Counterparty

Party

A client can fill in the receiving/delivering custodian, depending on the type of instruction (receive or deliver).

- BIC-code: the BIC-code has to be typed by the client
- External code: the external code of the place of settlement will automatically be offered, for example DTC, DAKV, The client can select the specific external code and fill in the code.
- Name: if the receiving/delivering custodian does not have a BIC-code or an external identifier code, the client can type the name of the receiving/delivering agent.

Account

In this field, the client can fill in the account of the buyer/seller with the receiving/delivering agent.

After completing all mandatory details, the client can confirm the transaction by clicking on the “Create” button. The screen can be cleared by clicking on the “Clear” button.

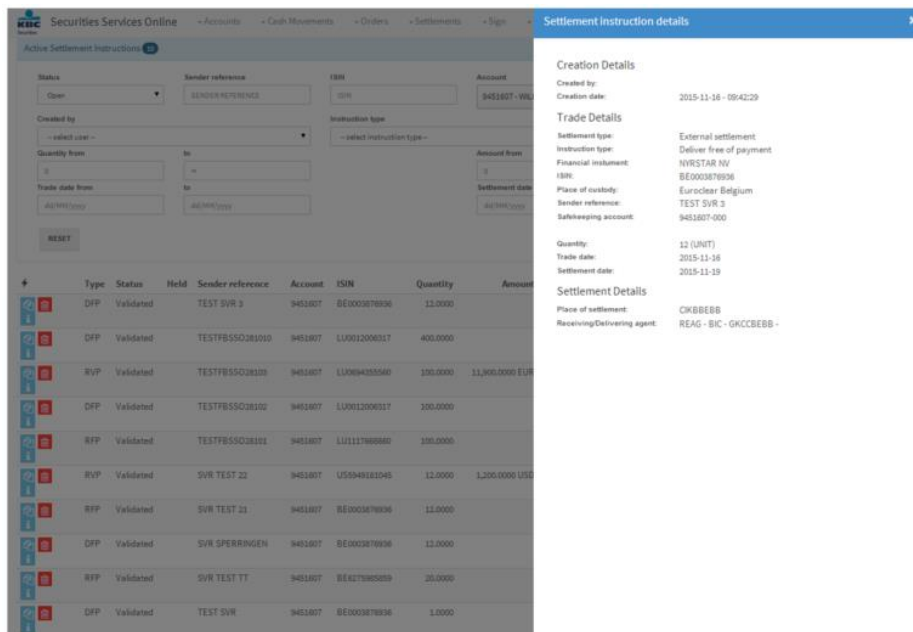

When the transaction is created, a pop-up will appear with the confirmation that the transaction has been created, stating the client reference and mentioning the need to sign the instruction.

Created!

Instruction with Sender Reference 000038800001 was successfully created, please note that the settlement instruction has to be signed.

This functionality gives the opportunity to do a bulk upload of external settlement instructions based on an excel template.

 GET TEMPLATE

The template looks as follows and can be filled in the same way as the screen in the settlement (Create External SI):

[illegible]

10.5.1 Trade Details

TRADE DETAILS											SETTLEMENT DETAILS		REAG/DEAG DETAILS				BUYER/SELLER DETAILS					
Settlement Type	Instruction Type	Client Account	Client Reference	Trade Date	Settlement Date	ISIN	POC	Security Description	Quantity	Currency	Amount	RD	RD Qualifier	RD Party Type	RD Party Code	RD Account	BS Qualifier	BS Party Type	BS Party Code	BS Account	Comment	Message

Create External Settlement Instruction

Trade Details

Function

New Message

Instruction type *

-- select --

Safeguarding account *

Search account...

Financial instrument *

Place of custody *

-- select --

Sender reference *

Quantity *

Settlement amount

-- select --

Trade date *

dd/mm/yyyy

Settlement date *

dd/mm/yyyy

Use auto reference

☐

Tip: in the settlement screen you can choose to use an auto reference (tick 'use auto reference' box). If no reference filled in in the excel template an auto reference will be created by default.

10.5.2 Settlement Details

For certain markets extra settlement details will have to be inserted. E.g on the Hong-Kong market you will have to add 'change of beneficial owner' details (CBO). Same option is available in the excel template.

TRADE DETAILS											SETTLEMENT DETAILS		REAG/DEAG DETAILS				BUYER/SELLER DETAILS			
Settlement Type	Instruction Type	Client Account	Client Reference	Trade Date	Settlement Date	ISIN	POC	Security Description	Quantity	Currency	Amount	CRD	RD Qualifier	RD Party Type	RD Party Code	RD Account	BS Qualifier	BS Party Type	BS Party Code	BS Account

Trade Details

Tip: When it comes to extra settlement details on Stamp Duty (e.g. UK market), these details are automatically filled in in the 'create external settlement instruction' screen based on a number of criteria (account, ISIN, Place of custody). Same logic applies for instructions that will be uploaded via the template. Therefore there is no need to insert them on the excel template.

Trade Details

10.5.3 REAG/DEAG Details

RD qualifier: REAG for delivery instructions / DEAG for receipt instructions

Filled in example:

Create External Settlement Instruction

Function	New Message

Upload Result

File: Template Example.xlsx

Status: FINISHED

Create Date: 15/11/2019 - 11:54AM

Modification Date: 11/15/19 11:54 AM

Status > finished > 4 settlement instructions were uploaded.

Tip: If you don't receive a status update in the center of the screen, you should click first on the 'Upload Result' box at the lower left side of your screen.

These 4 settlement instructions are now available in the sign module to be signed (exactly the same process as if you would insert your instructions manually via 'Create External SI').

Settlement instructions ready to sign 4

Created by --select--

SIGN 0 TRANSACTION(S)

<input type="checkbox"/> Select All	Type	Action	Sender reference	Account	Beneficiary	ISIN	Quantity	Amount	TD	SD	Place of custody
<input type="checkbox"/>	DVP			0126585-000		FI000900202	20.0000	2,000.0000 EUR	2019-11-12	2019-11-14	Helsinki
<input type="checkbox"/>	DFP			0126585-000		ES0105065009	40.0000		2019-11-12	2019-11-14	Madrid
<input type="checkbox"/>	RVP			0126585-000		AU000000AAE7	30.0000	1,000.0000 AUD	2019-11-12	2019-11-14	Sydney
<input type="checkbox"/>	RFP			0126585-000		HK0000065349	50.0000		2019-11-12	2019-11-14	Hong-Kong

Maximum capacity: It is possible to upload up to 500 instructions at once.

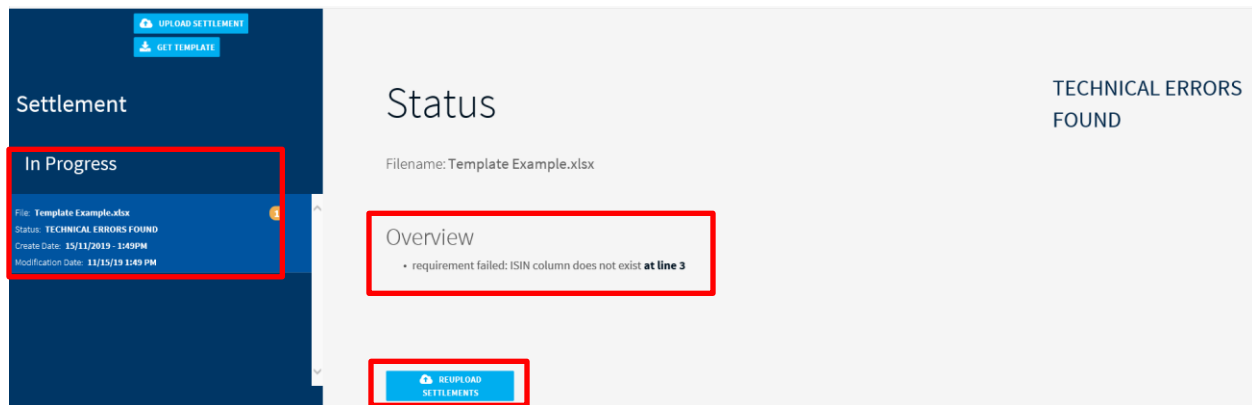

10.5.6 Error messages

1. Technical errors

If one of the mandatory fields is not filled in in the template this will result in a technical error.
E.g. no ISIN code in the 2nd example (all other details remain the same then in previous example)

TRADE DETAILS											
Settlement Type	Instruction Type	Client Account	Client Reference	Trade Date	Settlement Date	ISIN	POC	Security Description	Quantity	Currency	Amount
EXTERNAL	RFP-Receive free of payment	0126585		12/11/2019	14/11/2019	HK0000065349	Hong-Kong		50,0000		
EXTERNAL	RVP-Receive against payment	0126585		12/11/2019	14/11/2019		Sydney		30,0000	AUD	1000,0000
EXTERNAL	DFP-Deliver free of payment	0126585		12/11/2019	14/11/2019	ES0105065009	Madrid		40,0000		
EXTERNAL	DVP-Deliver against payment	0126585		12/11/2019	14/11/2019	FI0009000202	Helsinki		20,0000	EUR	2000,0000

If we try to upload this excel, it will result in the below:

Settlement

In Progress

File: Template Example.xlsx
Status: TECHNICAL ERRORS FOUND
Create Date: 15/11/2019 - 1:45PM
Modification Date: 11/15/19 1:49 PM

Status

Filename: Template Example.xlsx

Overview

- requirement failed: ISIN column does not exist at line 3

TECHNICAL ERRORS FOUND

REUPLOAD SETTLEMENTS

The excel sheet could not be uploaded due to the missing ISIN code. This will result in a 'technical error' and the type of error is displayed on your screen (in this case 'ISIN column does not exist at line 3'). Once this error is corrected in the excel sheet, it should be possible to upload. This can be done via the 're-

upload settlements button'

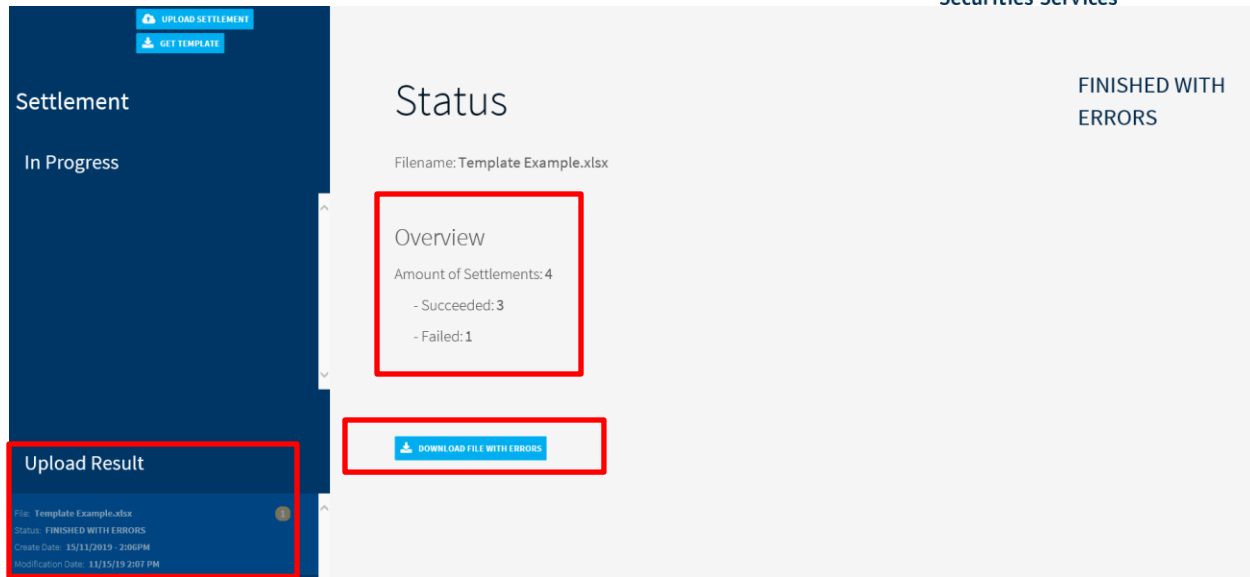

Tip: If you don't receive a status update in the center of the screen, you should click first on the 'In Progress' box at the upper left side of your screen.

2. Finished with errors

If we take again the same example: in this case we 'forgot' to fill in the currency for a RVP instruction:

TRADE DETAILS											
Settlement Type	Instruction Type	Client Account	Client Reference	Trade Date	Settlement Date	ISIN	POC	Security Description	Quantity	Currency	Amount
EXTERNAL	RFP-Receive free of payment	0126585		12/11/2019	14/11/2019	HK0000065349	Hong-Kong		50,0000		
EXTERNAL	RVP-Receive against payment	0126585		12/11/2019	14/11/2019	AU0000000AEE7	Sydney		30,0000		1000,0000
EXTERNAL	DFP-Deliver free of payment	0126585		12/11/2019	14/11/2019	ES0105065009	Madrid		40,0000		
EXTERNAL	DVP-Deliver against payment	0126585		12/11/2019	14/11/2019	FI0009000202	Helsinki		20,0000	EUR	2000,0000

If we upload this excel, we get the following upload result:

The file could be uploaded, but with errors.

3 out of 4 instructions have been uploaded correctly and are ready to be signed in the sign module.

1 out of 4 instructions failed and could not be uploaded. To check on the issue with this instruction you

can download the 'download file with errors'

[DOWNLOAD FILE WITH ERRORS](#)

If you open the file you will see why the instruction could not be uploaded in the 'comment' and 'message' column:

TRADE DETAILS											
Settlement Type	Instruction Type	Client Account	Client Reference	Trade Date	Settlement Date	ISIN	POC	Security Description	Quantity	Currency	
EXTERNAL	RVP-Receive against payment	0126585		12/11/2019	14/11/2019	AU000000AEE7	Sydney		30,000		
SETTLEMENT DETAILS			REAG/DEAG DETAILS			BUYER/SELLER DETAILS					
Amount	CBO	RD Qualifier	RD Party Type	RD Party Code	RD Account	BS Qualifier	BS Party Type	BS Party Code	BS Account	Comment	Message
1000,0000		DEAG	BIC	GEBABEBB						ERROR	The currency is missing or is not valid

You can correct the error in this file and upload again.

11 Product

The product module offers access to KID and target market information, as described in Mifid II.

11.1 Product Information

The Product Information page offers a securities finder, through which info on KID's and target market information can be requested.

Possible search criteria:

Find financial instrument

ISIN	MIC	Name	Internal code	Security group
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	-- select --
Place of custody	Place of trade	Currency	Ticker	
-- Place Of Custody --	-- Place Of Trade --	-- select --	<input type="text"/>	
RESET			SEARCH	

ISIN

In this field, the user can fill in the ISIN-code of the security.

MIC

In this field, the user can fill in the MIC-code of the market.

Security name

In this field, the user can fill in the name of the security.

Internal code

In this field, the user can fill in the internal code of the security; this is the internal code in the system of KBC Securities.

Security Group

A list of all possible security Groups will be shown, the client can select a specific security Group.

Place of custody

A list of all possible places of custody will be shown; the client can select a specific place of custody.

Place of trade

A list of all possible places of trade will be shown; the client can select a specific place of trade.

Currency

A list of all currencies will be shown; the client can select a specific currency in the list or type the currency code.

Ticker

In this field, the client can look for a ticker code.

Based on one or more of these search criteria, a list of securities will be shown.

12 Reporting

For Wealth Management only. The 5 basic reports that are currently set up in our back office system (Securities Transactions, Securities Positions, Cash Movements, Cash Balances and Dividend Overview) are now also available on demand through SSO.

Date fields are mandatory for every report. The date is referred to as the system date.

Upon request of a report, it will be sent to the e-mail address specified in the 'on demand' report in our back office system.

KBC SECURITIES SERVICES

KBC Securities Services provides the infrastructure to run **global brokerage and custody operations**. We offer this full wealth managers, asset managers, private bankers and family offices. With our **BPO model** we offer a solution to outsource, partially or completely, their servicing processes. We take care of the increasing regulations, more complex standards so the customer can focus on their business and their clients. Quality of service, market intelligence, price and strategic commitment are driving our proposition.
